Dear Topics in Interdisciplinary Biology Students,

Please see the below example cover letter to be submitted together with modified version of your manuscript.

Please use and modify this template to prepare your cover letter. Make sure to include the answers to the two questions below for each reviewer.

Draft cover letter to the Editor for modified manuscripts:

Dear Editor,

Please find enclosed a modified version of my Microreview manuscript "The basic mechanism of pre-mRNA splicing". To address the concerns and comments raised by the 2 reviewers, I made the following changes to improve and clarify the manuscript. It is my hope that these changes make the manuscript acceptable for publication in Microreviews in Cell and Molecular Biology.

Sincerely,

Wang Yecheng

Reviewer A:

1. Briefly state if you found the comments of Reviewer A helpful or not.

I think his advice is quite useful and important to my microreview, while I have some explanations. He points out that 2 paragraph may be cut and pasted, but I think I have made marks at the beginning of these sentences that they were quoted from other papers. But I still change them in this version.

2. What changes did you make to your manuscript as a result of the comments of Reviewer A?

I changed the line height and put the application at the front. At the same time, I deleted the name and major. Further more, I revised the problems in the 2 paragraphs which he has pointed out.

Reviewer B:

1. Briefly state if you found the comments of Reviewer B helpful or not.

I think his advice is quite useful and important to my microreview. He points out that I should give some introduction of some specific terms and give more details of the experiments..

2. What changes did you make to your manuscript as a result of the comments of Reviewer B?

I have give some introduction of exons, introns and pre-RNA and it can make reader easier to know the ideas.
