Dear Editor,

Please find enclosed a modified version of my Microreview manuscript “Optical DNA Sequencing in a Nanopore Array”. To address the concerns and comments raised by the 2 reviewers, I made the following changes to improve and clarify the manuscript. It is my hope that these changes make the manuscript acceptable for publication in Microreviews in Cell and Molecular Biology.

Thank you.
Sincerely

Wei Shitian

Reviewer A:
1. Briefly state if you found the comments of Reviewer A helpful or not.
Reviewer A pointed out my spelling mistakes and some confusing points, which is very helpful to me and allowed me to improve the quality of my Microreview manuscript. But images are not easy to draw, because I didn’t do an experiment.
2. What changes did you make to your manuscript as a result of the comments of Reviewer A?
Spelling mistakes are corrected. Some importance of DNA sequencing and function of calcium ion are added.

Reviewer B:
1. Briefly state if you found the comments of Reviewer B helpful or not.
The review is quite brief and proves the manuscript is reader-friendly.
2. What changes did you make to your manuscript as a result of the comments of Reviewer B?
Almost none. The conclusions in my microreview are directly picked from the original journal, may be a little hasty for shortened length.
